

Item 9	Insurance and assets register review
--------	--------------------------------------

Following a review of the assets register at the March 2023 meeting I have been in correspondence with the insurers.

They have compared the information they hold on our assets with the amounts insured and our assets register and their underwriter has commented as below:-

*The main differences that concerned me between the Asset Register and your current cover are the following;*

*Gates and Fences are covered up to 11,916 when I have the asset register showing 2,200.*

*Other surfaces is covered for over 30,000 pounds but we have nothing to highlight OS in the asset register.*

*We only have a mower which would fall under the Mowers and Machinery section yet you currently cover 11,319.*

#### **Recommendation:**

That the Parish Council consider the comments compared against the attached assets register and it is recommended:

1. That the MUGA surface be added to the assets register
2. Review of which gates and fences should be included
3. Review of what mowers and machinery is in the ownership of the PC. Should this be covered on an old for new basis.

Insurance has been renewed subject to any update of the policy.
